Nimbus business continuity and office disruption

Version: 2026.2. Effective date: 2026-09-01. Owner: Business Operations.

Access scope: workshop-public. Supersedes previous-policy.md.

Applicability

Nimbus workforce continuity when an office or shared work location is unavailable; technical database recovery uses source-27.

Activation

The duty operations lead activates continuity arrangements when an office is unsafe or unavailable for more than two hours. Safety instructions from the building authority take priority. Managers confirm staff wellbeing through approved channels without collecting unnecessary location or health details.

Work priorities

Prioritize incident response, customer support, payroll coordination, and essential supplier payments. Move work to approved remote arrangements or another Nimbus location. Personal email and unmanaged devices are not fallback channels for customer data.

Communication and review

The operations lead publishes an initial internal update within 30 minutes of activation and an update at least every two hours during working hours. State the affected location, alternative arrangement, and next update time. Reassess the plan each working day.

Restoration and boundaries

Return requires facilities clearance and the operations lead's announcement. Restoring an office does not itself confirm application health. Team handovers and delegated approvals must remain recorded. A two-hour activation threshold is not a promise to reopen within two hours. Accessibility needs are coordinated privately with People Operations.
